**TRAMAC CORPORATION CELEBRATES 40TH ANNIVERSARY**

Tramac Corporation and Tramac Equipment Ltd. celebrated their 40th anniversary in October. To commemorate the occasion Denis Bataille, President, arranged a celebration at the Fairmont Le Manoir in Charlevoix, Canada for all North American employees and spouses; key employees of Tramac Benelux in Belgium joined in the festivities. Activities included a reception and dinner on Saturday night and a whale watching boat trip on Sunday. Nestled majestically between the Saint-Lawrence River and mountains, the Manoir Richelieu provided an excellent backdrop for the occasion.

Tramac Corporation (originally American Tradex) was established in 1966 by Jacques Bataille and continues to be managed by the Bataille family. In addition to the US operation, which has recently introduced its Muscle Mate® brand of attachments, Tramac Equipment Ltd. operates throughout Canada and Tramac-Benelux operates in Belgium and Luxemburg. In the US, Tramac markets stationary boom systems and excavator attachments under the Muscle Mate® brand. In Canada, Belgium and Luxemburg hydraulic hammers, plate compactors, excavator attachments and stationary boom systems are marketed. Tramac Corporation has been and continues to be an industry leader for innovative products and product support that makes it a cut above the competition.
