TRAMAC CORPORATION INTRODUCES THE MUSCLE MATE MOBILE RAIL CUTTER

Tramac Corporation brand, announces its new Muscle Mate RC26R mobile rail cutter. The RC26R offers an economical and safe process for cutting rails into any desired size. Production can easily exceed 12 tons per hour. The jaw design of the RC26R allows for a controlled cut, minimizing debris. Designed to operate on excavators in the 16-26 ton range, the RC26R offers 180° high stress resistant hydraulic rotation. The profile of the shear allows good visibility for the operator.

Tramac Corporation, headquartered in Landing, NJ, is a pioneer in the attachment industry, having been in business since 1966. The company's Muscle Mate line of quality engineered excavator attachments is undergoing major expansion this year. Inquiries can be directed to Tramac at 800 526-3837 or www.muscle-mate.com.
